

ERRATUM

In the Methods section of an article by Thase et al (*Biol Psychiatry* 1997;41:964–973) it was incorrectly stated that a discriminant index score that was derived from a healthy control group was subtracted from a score derived from depressed inpatients. Rather, scores from patients were

subtracted from the control subjects. The formula used to classify sleep abnormality, $[-20.5 + (0.519 \times \text{RL}) - (1.61 \times \text{RD}) + (0.22 \times \text{SE})]$, is reported correctly. The error in describing the method does not affect the results of the article.
