Volume 70, Number 11, December 1, 2011

STRESS, ANXIETY, AND SEROTONIN

IN THIS ISSUE – DECEMBER 1ST

1001 A brief summary of the articles appearing in this issue of *Biological Psychiatry*.

COMMENTARIES

1002 Pathophysiological Modeling of Obsessive-Compulsive Disorder: Challenges and Progress
Christopher Pittenger

» See companion article on page 1039

1004 Attention Bias Modification and the Serotonin Transporter: Personalized Treatment Implications of Gene Interactions with Learning
Jennifer C. Britton and Scott L. Rauch

» See companion article on page 1049

1006 Stress and the Baby Brain

Caitlin E. McOmish and Jay A. Gingrich

» See companion article on page 1024

PRIORITY COMMUNICATION

1008 Adverse Rearing Environments and Neural Development in Children: The Development of Frontal Electroencephalogram Asymmetry

Katie A. McLaughlin, Nathan A. Fox, Charles H. Zeanah, and Charles A. Nelson

ARCHIVAL REPORTS

1016 Blunted Cortisol Responses to Stress Signal Social and Behavioral Problems Among Maltreated/Bullied 12-Year-Old Children

Isabelle Ouellet-Morin, Candice L. Odgers, Andrea Danese, Lucy Bowes, Sania Shakoor, Andrew S. Papadopoulos, Avshalom Caspi, Terrie E. Moffitt, and Louise Arseneault

1024 Postnatal Serotonin Type 2 Receptor Blockade Prevents the Emergence of Anxiety Behavior, Dysregulated Stress-Induced Immediate Early Gene Responses, and Specific Transcriptional Changes that Arise Following Early Life Stress

Madhurima Benekareddy, Krishna C. Vadodaria, Amrita R. Nair, and Vidita A. Vaidya

» See commentary on page 1006

1033 Reduced Amygdala Serotonin Transporter Binding in Posttraumatic Stress Disorder

James W. Murrough, Yiyun Huang, Jian Hu, Shannan Henry, Wendol Williams, Jean-Dominique Gallezot, Christopher R. Bailey, John H. Krystal, Richard E. Carson, and Alexander Neumeister

1039 Essential Role for Orbitofrontal Serotonin 1B Receptors in Obsessive-Compulsive Disorder-Like Behavior and Serotonin Reuptake Inhibitor Response in Mice

Nancy A. Shanahan, Lady P. Velez, Virginia L. Masten, and Stephanie C. Dulawa

» See commentary on page 1002

1049 The Serotonin Transporter Gene Alters Sensitivity to Attention Bias Modification: Evidence for a Plasticity Gene

Elaine Fox, Konstantina Zougkou, Anna Ridgewell, and Kelly Garner

» See commentary on page 1004

1055 Cortisol Awakening Response Prospectively Predicts Peritraumatic and Acute Stress Reactions in Police Officers

Sabra S. Inslicht, Christian Otte, Shannon E. McCaslin, Brigitte A. Apfel, Clare Henn-Haase, Thomas Metzler, Rachel Yehuda, Thomas C. Neylan, and Charles R. Marmar

1063 Days-Out-of-Role Associated With Insomnia and Comorbid Conditions in the America Insomnia Survey

Goeran Hajak, Maria Petukhova, Matthew D. Lakoma, Catherine Coulouvrat, Thomas Roth, Nancy A. Sampson, Victoria Shahly, Alicia C. Shillington, Judith J. Stephenson, James K. Walsh, and Ronald C. Kessler

1074 Proteomics and Metabolomics Analysis of a Trait Anxiety Mouse Model Reveals Divergent Mitochondrial Pathways

Michaela D. Filiou, Yaoyang Zhang, Larysa Teplytska, Stefan Reckow, Philipp Gormanns, Giuseppina Maccarrone, Elisabeth Frank, Melanie S. Kessler, Boris Hamsch, Markus Nussbaumer, Mirjam Bunck, Tonia Ludwig, Alexander Yassouridis, Florian Holsboer, Rainer Landgraf, and Christoph W. Turck

1083 Changes in Gray Matter Volume and White Matter Microstructure in Adolescents with Obsessive-Compulsive Disorder

Mojtaba Zarei, David Mataix-Cols, Isobel Heyman, Morgan Hough, Joanne Doherty, Linda Burge, Louise Winmill, Sunita Nijhawan, Paul M. Matthews, and Anthony James

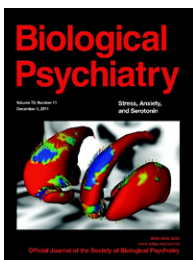

1091 Catechol-O-Methyltransferase Val158Met Polymorphism Moderates Anterior Cingulate Volume in Posttraumatic Stress Disorder

R. Jay Schulz-Heik, Marie Schaer, Stephan Eliez, Joachim F. Hallmayer, Xiaoyan Lin, Danny G. Kaloupek, and Steven H. Woodward

ERRATA

1097 Erratum to: Multivariate Searchlight Classification of Structural Magnetic Resonance Imaging in Children and Adolescents with Autism

1098 Erratum to: Glutamatergic Gene Expression Is Specifically Reduced in Thalamocortical Projecting Relay Neurons in Schizophrenia

The image on the cover, a vertex-wise shape analysis, shows data from Zarei *et al.*, pages 1083-1090, in this issue. The analysis comparing the control group with obsessive-compulsive disorder (OCD) subjects shows regional hypertrophy in the caudate in OCD children. Arrows show the direction of vertex shift in the OCD group and the colors (red to blue) indicate the *F* value.
