OXYTOCIN AND SOCIAL BONDS IN DEVELOPMENT

IN THIS ISSUE – AUGUST 1ST

- 165** A brief summary of the articles appearing in this issue of *Biological Psychiatry*.

COMMENTARIES

- 166** **Planning the New National Institute on Substance Use and Addiction Disorders**
Eric J. Nestler and John H. Krystal
- 168** **CD38 and Behavior: Moving from Correlation to Causality?**
Enrico Brunetti and Fabio Malavasi
» See companion article on page 175
- 171** **Is It in Our Genes: Oxytocin, Dopamine, Stress, and Sex**
Anissa Abi-Dargham
» See companion article on page 198
- 173** **The Social Life of Neurons: Synaptic Communication Deficits as a Common Denominator of Autism, Schizophrenia, and Other Cognitive Disorders**
Detlef H. Heck and Lu Lu
» See companion article on page 182

PRIORITY COMMUNICATIONS

- 175** **Sensitive Parenting Is Associated with Plasma Oxytocin and Polymorphisms in the OXTR and CD38 Genes**
Ruth Feldman, Orna Zagoory-Sharon, Omri Weisman, Inna Schneiderman, Ilanit Gordon, Rina Maoz, Idan Shalev, and Richard P. Ebstein
» See commentary on page 168

- 182** **Reversal of Impaired Hippocampal Long-Term Potentiation and Contextual Fear Memory Deficits in Angelman Syndrome Model Mice by ErbB Inhibitors**

Hanoch Kaphzan, Pepe Hernandez, Joo In Jung, Kiriana K. Cowansage, Katrin Deinhardt, Moses V. Chao, Ted Abel, and Eric Klann
» See commentary on page 173

- 191** **Development of Cortical Surface Area and Gyrfication in Attention-Deficit/Hyperactivity Disorder**

Philip Shaw, Meaghan Malek, Bethany Watson, Wendy Sharp, Alan Evans, and Deanna Greenstein

ARCHIVAL REPORTS

- 198** **Oxytocin Gene Polymorphisms Influence Human Dopaminergic Function in a Sex-Dependent Manner**
Tiffany M. Love, Mary-Anne Enoch, Colin A. Hodgkinson, Marta Peciña, Brian Mickey, Robert A. Koeppe, Christian S. Stohler, David Goldman, and Jon-Kar Zubieta
» See commentary on page 171
- 207** **Cortical Thickness and Folding Deficits in Conduct-Disordered Adolescents**
Christopher J. Hyatt, Emily Haney-Caron, and Michael C. Stevens
- 215** **A Magnetization Transfer Imaging Study of Corpus Callosum Myelination in Young Children with Autism**
Marta Gozzi, Dylan M. Nielson, Rhoshel K. Lenroot, John L. Ostuni, David A. Luckenbaugh, Audrey E. Thurm, Jay N. Giedd, and Susan E. Swedo

221 Psychostimulants Act Within the Prefrontal Cortex to Improve Cognitive Function

Robert C. Spencer, Raymond M. Klein, and Craig W. Berridge

228 Early-Life Mental Disorders and Adult Household Income in the World Mental Health Surveys

Norito Kawakami, Emad Abdulrazaq Abdulghani, Jordi Alonso, Evelyn J. Bromet, Ronny Bruffaerts, José Miguel Caldas-de-Almeida, Wai Tat Chiu, Giovanni de Girolamo, Ron de Graaf, John Fayyad, Finola Ferry, Silvia Florescu, Oye Gureje, Chiyi Hu, Matthew D. Lakoma, William LeBlanc, Sing Lee, Daphna Levinson, Savita Malhotra, Herbert Matschinger, Maria Elena Medina-Mora, Yosikazu Nakamura, Mark A. Oakley Browne, Michail Okoliyski, Jose Posada-Villa, Nancy A. Sampson, Maria Carmen Viana, and Ronald C. Kessler

238 Cerebrospinal Fluid Substance P-Like Immunoreactivity Correlates with Aggression in Personality Disordered Subjects

Emil F. Coccaro, Royce Lee, Michael J. Owens, Becky Kinkead, and Charles B. Nemeroff

244 Similar Improvement of Reward and Punishment Learning by Serotonin Reuptake Inhibitors in Obsessive-Compulsive Disorder

Stefano Palminteri, Anne-Hélène Clair, Luc Mallet, and Mathias Pessiglione

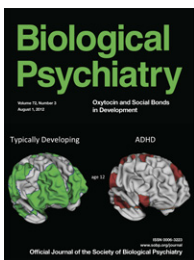

CORRESPONDENCE

e3  Oxytocin and Pair Bonding: On Possible Influences During the Life Course

Beate Ditzen, Bekh Bradley, and Christine M. Heim

e5  Amygdala Lesion Profoundly Alters Altruistic Punishment

Dirk Scheele, Yoan Mihov, Keith M. Kendrick, Justin S. Feinstein, Harald Reich, Wolfgang Maier, and René Hurlemann

The image on the cover shows the delay in attaining peak surface area in children with attention-deficit/hyperactivity disorder, in comparison to typically developing children. This image is a still from movie 1 (available online) in Shaw *et al.* (pages 191-197, in this issue). The complete movie shows the development of peak surface area in both groups of children over time, from ages 6 through 16.
