

Biological Psychiatry

A Journal of Psychiatric Neuroscience and Therapeutics

Volume 72, Number 7, October 1, 2012

NOVEL PHARMACOTHERAPIES FOR DEPRESSION

IN THIS ISSUE – OCTOBER 1ST

- 521** A brief summary of the articles appearing in this issue of *Biological Psychiatry*.

COMMENTARIES

- 522** **Ketamine: The Hopes and the Hurdles**
Sheldon H. Preskorn
» See companion article on page 537
- 524** **Evidence for Global Reduction in Brain Cyclic Adenosine Monophosphate Signaling in Depression**
James M. O'Donnell and Ying Xu
» See companion article on page 548
- 526** **A “Taste” of What is to Come: Reward Sensitivity as a Potential Endophenotype for Major Depressive Disorder**
W. Kyle Simmons and Wayne C. Drevets
» See companion article on page 588

PRIORITY COMMUNICATION

- 528** **Deletion of CREB-Regulated Transcription Coactivator 1 Induces Pathological Aggression, Depression-Related Behaviors, and Neuroplasticity Genes Dysregulation in Mice**
Lionel Breuillaud, Clara Rossetti, Elsa M. Meylan, Christophe Mérinat, Olivier Halfon, Pierre J. Magistretti, and Jean-René Cardinaux

REVIEW

- 537** **Ketamine for Depression: Where Do We Go from Here?**
Marije aan het Rot, Carlos A. Zarate Jr., Dennis S. Charney, and Sanjay J. Mathew
» See commentary on page 522

ARCHIVAL REPORTS

- 548** **Downregulation of Brain Phosphodiesterase Type IV Measured with ^{11}C -(R)-Rolipram Positron Emission Tomography in Major Depressive Disorder**
Masahiro Fujita, Christina S. Hines, Sami S. Zoghbi, Alan G. Mallinger, Leah P. Dickstein, Jehi-San Liow, Yi Zhang, Victor W. Pike, Wayne C. Drevets, Robert B. Innis, and Carlos A. Zarate Jr.
» See commentary on page 524
- 555** **Synaptic Potentiation Is Critical for Rapid Antidepressant Response to Ketamine in Treatment-Resistant Major Depression**
Brian R. Cornwell, Giacomo Salvatore, Maura Furey, Craig A. Marquardt, Nancy E. Brutsche, Christian Grillon, and Carlos A. Zarate Jr.
- 562** **Hippocampal Angiogenesis and Progenitor Cell Proliferation Are Increased with Antidepressant Use in Major Depression**
Maura Boldrini, René Hen, Mark D. Underwood, Gorazd B. Rosoklija, Andrew J. Dwork, J. John Mann, and Victoria Arango

572 Using Attentional Bias Modification as a Cognitive Vaccine Against Depression

Michael Browning, Emily A. Holmes, Matthew Charles, Philip J. Cowen, and Catherine J. Harmer

580 Vocal Acoustic Biomarkers of Depression Severity and Treatment Response

James C. Mundt, Adam P. Vogel, Douglas E. Feltner, and William R. Lenderking

588 Neural Processing of Reward and Punishment in Young People at Increased Familial Risk of Depression

Ciara McCabe, Caroline Woffindale, Catherine J. Harmer, and Philip J. Cowen
» See commentary on page 526

595 Efficacy of Transcranial Magnetic Stimulation Targets for Depression Is Related to Intrinsic Functional Connectivity with the Subgenual Cingulate

Michael D. Fox, Randy L. Buckner, Matthew P. White, Michael D. Greicius, and Alvaro Pascual-Leone

604 Reversed Frontotemporal Connectivity During Emotional Face Processing in Remitted Depression

Nia Goulden, Shane McKie, Emma J. Thomas, Darragh Downey, Gabriella Juhasz, Stephen R. Williams, James B. Rowe, J.F. William Deakin, Ian M. Anderson, and Rebecca Elliott

CORRESPONDENCE

e17 Lithium and the Expanding Brain

William T. Regenold

e19 Reply to: Lithium and the Expanding Brain

Anthony C. Vernon, Sridhar Natesan, William R. Crum, Michel Modo, Jonathan D. Cooper, Steven C.R. Williams, and Shitij Kapur

The image on the cover, from the human hippocampus, represents work from Boldrini *et al.* (pages 562-571, in this issue). Nestin-immunoreactive neural progenitor cells and capillaries (in brown) in the subgranular zone of the dentate gyrus are increased with antidepressant treatment. Granule cells are stained for Nissl with cresyl violet (in blue).
