CORTICAL DEVELOPMENT IN ATTENTION-DEFICIT/HYPERACTIVITY DISORDER

IN THIS ISSUE – OCTOBER 15TH

595 A brief summary of the articles appearing in this issue of *Biological Psychiatry*.

COMMENTARIES

596 **The Impact of Stimulants on Cognition and the Brain in Attention-Deficit/Hyperactivity Disorder: What Does Age Have to Do With It?**
B.J. Casey and Sarah Durston
» See companion articles on pages 603 and 616

599 **Advances in the Genetics of Attention-Deficit/Hyperactivity Disorder**
Stephen V. Faraone
» See companion articles on pages 639 and 664

601 **Understanding Alterations in Brain Connectivity in Attention-Deficit/Hyperactivity Disorder Using Imaging Connectomics**
Martha E. Shenton, Marek Kubicki, and Nikos Makris
» See companion article on page 656

ARCHIVAL REPORTS

603 **Effects of Methylphenidate on Cognitive Functions in Children and Adolescents with Attention-Deficit/Hyperactivity Disorder: Evidence from a Systematic Review and a Meta-Analysis**
David R. Coghill, Sarah Seth, Sara Pedroso, Tatiana Usala, John Currie, and Antonella Gagliano
» See commentary on page 596

616 **Effects of Stimulants on Brain Function in Attention-Deficit/Hyperactivity Disorder: A Systematic Review and Meta-Analysis**
Katya Rubia, Analucia A. Alegria, Ana I. Cubillo, Anna B. Smith, Michael J. Brammer, and Joaquim Radua

» See commentary on page 596

629 **Widespread Reductions in Cortical Thickness Following Severe Early-Life Deprivation: A Neurodevelopmental Pathway to Attention-Deficit/Hyperactivity Disorder**
Katie A. McLaughlin, Margaret A. Sheridan, Warren Winter, Nathan A. Fox, Charles H. Zeanah, and Charles A. Nelson

639 **Neuroanatomical Abnormalities and Cognitive Impairments Are Shared by Adults with Attention-Deficit/Hyperactivity Disorder and Their Unaffected First-Degree Relatives**
Valentino Antonio Pironti, Meng-Chuan Lai, Ulrich Müller, Chris Martin Dodds, John Suckling, Edward Thomas Bullmore, and Barbara Jacquelyn Sahakian
» See commentary on page 599

648 **Neuregulin-3 in the Mouse Medial Prefrontal Cortex Regulates Impulsive Action**
Maarten Loos, Thomas Mueller, Yvonne Gouwenberg, Ruud Wijnands, Rolinka J. van der Loo, Neuro-BSIK Mouse Phenomics Consortium, Carmen Birchmeier, August B. Smit, and Sabine Spijker

656 Connectomic Disturbances in Attention-Deficit/Hyperactivity Disorder: A Whole-Brain Tractography Analysis

Soon-Beom Hong, Andrew Zalesky, Alex Fornito, Subin Park, Young-Hui Yang, Min-Hyeon Park, In-Chan Song, Chul-Ho Sohn, Min-Sup Shin, Bung-Nyun Kim, Soo-Churl Cho, Doug Hyun Han, Jae Hoon Cheong, and Jae-Won Kim

» See commentary on page 601

664 Genetic Risk for Attention-Deficit/Hyperactivity Disorder Contributes to Neurodevelopmental Traits in the General Population

Joanna Martin, Marian L. Hamshere, Evangelia Stergiakouli, Michael C. O'Donovan, and Anita Thapar

» See commentary on page 599

CORRESPONDENCE

e19 Attention-Deficit/Hyperactivity Disorder and Solar Irradiance: A Cloudy Perspective

Maurício S. Hoffmann, Guilherme V. Polanczyk, Christian Kieling, Ísis P. dos Santos, Erik G. Willcutt, Luis A. Rohde, and Giovanni A. Salum

e21 Reply to: Attention-Deficit/Hyperactivity Disorder and Solar Irradiance: A Cloudy Perspective

Martijn Arns, Kristiaan B. van der Heijden, L. Eugene Arnold, James M. Swanson, and J. Leon Kenemans

The image on the cover, from Loos *et al.* (in this issue, pages 648-655), depicts cellular localization of *Nrg3* mRNA (green) in the medial prefrontal cortex of mice (Red: *Gad1* mRNA on left, *Camk2a* on right; Blue: DAPI). Their work identified a relationship between *Nrg3* expression in the medial prefrontal cortex and impulsive behavior. Composed from panels C (left) and D (right) from Figure 3.
