

ERRATUM

An error in the text has been discovered in the commentary "Deep Repetitive Transcranial Magnetic Stimulation for Smoking Cessation: Is Going Deeper Better?" by Barr and George (2014;76:678–680). The affected section of incorrect text begins on the 5th line of the second paragraph and currently states "... employing the H-coil,

which has been shown to target brain regions approximately 5–7 cm deep. This focal depth with the H-coil is very exciting...". The corrected version of this text is as follows: "... employing the H-coil, which has been shown to target brain regions up to approximately 3–4 cm deep. This depth with the H-coil is very exciting...".
