## EXTINCTION AND POSTTRAUMATIC STRESS DISORDER TREATMENT

### IN THIS ISSUE - AUGUST 1ST

---

- 151 **A brief summary of the articles appearing in this issue of *Biological Psychiatry*.**

### COMMENTARIES

---

- 152 **Sex, Steroids, and Fear**  
*Naomi Nagaya and Stephen Maren*  
» See corresponding articles on pages 178 and 186
- 154 **Oxytocin Enhancement of Fear Extinction: A New Target for Facilitating Exposure-Based Treatments?**  
*Dean T. Acheson and Victoria B. Risbrough*  
» See corresponding article on page 194
- 156 **Trauma Re-experiencing Symptoms Modulate Topology of Intrinsic Functional Networks**  
*Rajendra A. Morey, Sarah C. Lancaster, and Courtney C. Haswell*  
» See corresponding article on page 210

### PRIORITY COMMUNICATION

---

- 159 **Differences in Stress-Induced Changes in Extinction and Prefrontal Plasticity in Postweanling and Adult Animals**  
*Rachel Schayek and Mouna Maroun*

### REVIEWS

---

- 167 **Pituitary Adenylate Cyclase Activating Polypeptide in Stress-Related Disorders: Data Convergence from Animal and Human Studies**  
*Sayamwong E. Hammack and Victor May*

- 178 **Estrogen and Extinction of Fear Memories: Implications for Posttraumatic Stress Disorder Treatment**

*Ebony M. Glover, Tanja Jovanovic, and Seth Davin Norrholm*

» See commentary on page 152

### ARCHIVAL REPORTS

---

- 186 **Sex-Specific Neuroanatomical Correlates of Fear Expression in Prefrontal-Amygdala Circuits**  
*Tina M. Gruene, Elian Roberts, Virginia Thomas, Ashley Ronzio, and Rebecca M. Shansky*  
» See commentary on page 152
- 194 **Oxytocin Facilitates the Extinction of Conditioned Fear in Humans**  
*Monika Eckstein, Benjamin Becker, Dirk Scheele, Claudia Scholz, Katrin Preckel, Thomas E. Schlaepfer, Valery Grinevich, Keith M. Kendrick, Wolfgang Maier, and René Hurlemann*  
» See commentary on page 154
- 203 **Novelty-Facilitated Extinction: Providing a Novel Outcome in Place of an Expected Threat Diminishes Recovery of Defensive Responses**  
*Joseph E. Dunsmoor, Vinn D. Campese, Ahmet O. Ceceli, Joseph E. LeDoux, and Elizabeth A. Phelps*

210 **Brain Network Disturbance Related to Posttraumatic Stress and Traumatic Brain Injury in Veterans**

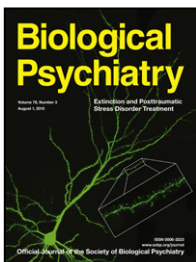

*Jeffrey M. Spielberg, Regina E. McGlinchey, William P. Milberg, and David H. Salat*

» See commentary on page 156

**CORRESPONDENCE**

e5 **Glucocorticoid Functioning in Male Combat Veterans with Posttraumatic Stress Disorder and Mild Traumatic Brain Injury**

*Janine D. Flory, Clare Henn-Haase, Linda M. Bierer, Amy Lehrner, Iouri Makotkine, Charles R. Marmar, and Rachel Yehuda*

Gruene *et al.* (in this issue; pages 186-193) used fear extinction to investigate sex-specific relationships in infralimbic-basolateral amygdala neurons and report distinct morphologic features in male, but not female, rats. The particular dendritic segment highlighted on the cover, from Figure 4A, is from a high-freezing male rat, which showed a greater density of thin spines in comparison to low-freezing male rats. Image credit: Katelyn Flick and Tina Gruene.
