CORTICAL FUNCTION AND SOCIAL DEFICITS IN AUTISM

IN THIS ISSUE - APRIL 15TH

625 A brief summary of the articles appearing in this issue of *Biological Psychiatry*.

COMMENTARIES

626 **Autism as a Disorder of Altered Global Functional and Structural Connectivity**
Ludger Tebartz van Elst, Andreas Riedel, and Simon Maier
» See corresponding article on page 633

628 **The Genetics-Driven Revival in Neuropsychiatric Drug Development**
Michael J. Gandal and Daniel H. Geschwind
» See corresponding article on page 650

631 **Oxytocin Effects on Brain Functioning in Humans**
Sabine C. Herpertz and Katja Bertsch
» See corresponding article on page 693

EARLY CAREER INVESTIGATOR COMMENTARY

e47 **Toward a Multimodal, Multiscale Understanding of White Matter Abnormalities in Autism Spectrum Disorder**
Jason W. Bohland
» See corresponding article on page 676

PRIORITY COMMUNICATION

633 **Intrinsic Visual-Motor Synchrony Correlates With Social Deficits in Autism**
Mary Beth Nebel, Ani Eloyan, Carrie A. Nettles, Kristie L. Sweeney, Katarina Ament, Rebecca E. Ward, Ann S. Choe, Anita D. Barber, James J. Pekar, and Stewart H. Mostofsky
» See commentary on page 626

REVIEWS

642 **The Human Model: Changing Focus on Autism Research**
Alysson Renato Muotri

650 **Translating Neurogenomics Into New Medicines**
Jens R. Wendland and Michael D. Ehlers
» See commentary on page 628

ARCHIVAL REPORTS

657 **Eye Tracking Reveals Abnormal Visual Preference for Geometric Images as an Early Biomarker of an Autism Spectrum Disorder Subtype Associated With Increased Symptom Severity**
Karen Pierce, Steven Marinero, Roxana Hazin, Benjamin McKenna, Cynthia Carter Barnes, and Ajith Malige

667 **Putative Microcircuit-Level Substrates for Attention Are Disrupted in Mouse Models of Autism**
Francisco J. Luongo, Meryl E. Horn, and Vikaas S. Sohal

676 **Diffusion Tensor Imaging Provides Evidence of Possible Axonal Overconnectivity in Frontal Lobes in Autism Spectrum Disorder Toddlers**
Stephanie Solso, Ronghui Xu, James Proudfoot, Donald J. Hagler Jr., Kathleen Campbell, Vijay Venkatraman, Cynthia Carter Barnes, Clelia Ahrens-Barbeau, Karen Pierce, Anders Dale, Lisa Eyler, and Eric Courchesne
» See commentary on page e47

685 Metabotropic Glutamate Receptor and Fragile X Signaling in a Female Model of Escalated Aggression

Laura E. Been, Kelsey M. Moore, Bruce C. Kennedy, and Robert L. Meisel

693 A Spatiotemporal Profile of In Vivo Cerebral Blood Flow Changes Following Intranasal Oxytocin in Humans

Yannis Paloyelis, Orla M. Doyle, Fernando O. Zelaya, Stefanos Maltezos, Steven C. Williams, Aikaterini Fotopoulou, and Matthew A. Howard

» See commentary on page 631

e51 Reply to: Intranasal Oxytocin Mechanisms Can Be Better Understood, but Its Effects on Social Cognition and Behavior Are Not to Be Sniffed At

Gareth Leng and Mike Ludwig

e53 Improving Research Standards to Restore Trust in Intranasal Oxytocin

Dean S. Carson, Hsiangkuo Yuan, and Izelle Labuschagne

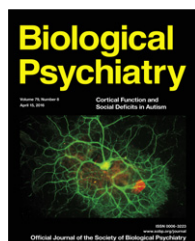

e55 Reply to: Improving Research Standards to Restore Trust in Intranasal Oxytocin

Gareth Leng and Mike Ludwig

CORRESPONDENCE

e49 Intranasal Oxytocin Mechanisms Can Be Better Understood, but Its Effects on Social Cognition and Behavior Are Not to Be Sniffed At

Daniel S. Quintana and Joshua D. Woolley

The image on the cover, provided by Alysson Muotri, depicts human neurons “in a dish.” Muotri’s review in this issue (pages 642–649) discusses how human induced pluripotent stem cell technology can be used to model and advance our understanding of autism.
