A Journal of Psychiatric Neuroscience and Therapeutics

Volume 79, Number 10, May 15, 2016

## MECHANISMS OF RESILIENCE TO STRESS EFFECTS

### IN THIS ISSUE - MAY 15TH

**787** A brief summary of the articles appearing in this issue of *Biological Psychiatry*.

### COMMENTARIES

**788** Sex, Drugs, and the Neurobiology of the Placebo Effect

*David R. Rubinow*

» See corresponding article on page 794

**790** Psychopathology Increases With Age in Fragile X Carrier Mothers

*Randi Hagerman*

» See corresponding article on page 850

**792** Endocannabinoids and Stress Resilience: Is Deficiency Sufficient to Promote Vulnerability?

*Matthew N. Hill and Francis S. Lee*

» See corresponding article on page 858

### EARLY CAREER INVESTIGATOR COMMENTARY

**e75** Magnetic Resonance Imaging of Psychological Susceptibility and Resilience

*Orion Paul Keifer Jr.*

» See corresponding article on page 840

### PRIORITY COMMUNICATION

**794** Vasopressin Boosts Placebo Analgesic Effects in Women: A Randomized Trial

*Luana Colloca, Daniel S. Pine, Monique Ernst, Franklin G. Miller, and Christian Grillon*

» See commentary on page 788

### ARCHIVAL REPORTS

**803** Sympathetic Release of Splenic Monocytes Promotes Recurring Anxiety Following Repeated Social Defeat

*Daniel B. McKim, Jenna M. Patterson, Eric S. Wohleb, Brant L. Jarrett, Brenda F. Reader, Jonathan P. Godbout, and John F. Sheridan*

**814** Stress Enables Reinforcement-Elicited Serotonergic Consolidation of Fear Memory

*Michael V. Baratta, Suhasa B. Kodandaramaiah, Patrick E. Monahan, Junmei Yao, Michael D. Weber, Pei-Ann Lin, Barbara Gisabella, Natalie Petrossian, Jose Amat, Kyungman Kim, Aimei Yang, Craig R. Forest, Edward S. Boyden, and Ki A. Goosens*

**823** Frontal Cortex Stimulation Reduces Vigilance to Threat: Implications for the Treatment of Depression and Anxiety

*Maria Ironside, Jacinta O'Shea, Philip J. Cowen, and Catherine J. Harmer*

**831** Maternal Exposure to Childhood Trauma Is Associated During Pregnancy With Placental-Fetal Stress Physiology

*Nora K. Moog, Claudia Buss, Sonja Entringer, Babak Shahbaba, Daniel L. Gillen, Calvin J. Hobel, and Pathik D. Wadhwa*

**840 Neuroanatomic Differences Associated With Stress Susceptibility and Resilience**

*Christoph Anacker, Jan Scholz, Kieran J. O'Donnell, Rylan Allemang-Grand, Josie Diorio, Rosemary C. Bagot, Eric J. Nestler, René Hen, Jason P. Lerch, and Michael J. Meaney*

» See commentary on page e75

**850 Trajectory and Predictors of Depression and Anxiety Disorders in Mothers With the *FMR1* Premutation**

*Jane E. Roberts, Bridgette L. Tonnsen, Lindsay M. McCary, Amy L. Ford, Robert N. Golden, and Donald B. Bailey Jr.*

» See commentary on page 790

**858 Anxiety, Stress, and Fear Response in Mice With Reduced Endocannabinoid Levels**

*Imke Jenniches, Svenja Ternes, Onder Albayram, David M. Otte, Karsten Bach, Laura Bindila, Kerstin Michel, Beat Lutz, Andras Bilkei-Gorzo, and Andreas Zimmer*

» See commentary on page 792

**CORRESPONDENCE**

**e78  The Anxiolytic Actions of 2-Arachidonoylglycerol: Converging Evidence From Two Recent Genetic Endocannabinoid Deficiency Models**

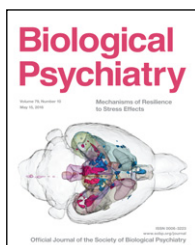

*Sachin Patel, Brian C. Shonesy, Rebecca J. Bluett, Danny G. Winder, and Roger J. Colbran*

**e80  Reply to: The Anxiolytic Actions of 2-Arachidonoylglycerol: Converging Evidence From Two Recent Genetic Endocannabinoid Deficiency Models**

*Imke Jenniches and Andreas Zimmer*

**e82  Deep Brain Stimulation of the Basolateral Amygdala for Treatment-Refractory Posttraumatic Stress Disorder**

*Jean-Philippe Langevin, Ralph J. Koek, Holly N. Schwartz, James W.Y. Chen, David L. Sultzer, Mark A. Mandelkern, Alexis D. Kulick, and Scott E. Krahl*

The 3-dimensional image on the cover, from Figure 1 of Anacker *et al.* (in this issue, pages 840–849), is a rendering of volume changes after chronic social defeat stress in mice. Red clusters indicate positive correlations with social avoidance, whereas blue clusters indicate negative correlations with social avoidance. Overall, the authors found neuroanatomic differences in stress-related brain regions between stress susceptible and stress resilient mice.
