A Journal of Psychiatric Neuroscience and Therapeutics

Volume 80, Number 6, September 15, 2016

## NEW INSIGHT INTO DEPRESSION THERAPEUTICS

### IN THIS ISSUE - SEPTEMBER 15TH

**415** A brief summary of the articles appearing in this issue of *Biological Psychiatry*.

### COMMENTARIES

**416** **Ketamine for Depression: An Update**  
*James W. Murrough*  
» See corresponding articles on pages 424, 448, and 457

**419** **Fibroblast Growth Factor 2 Sits at the Interface of Stress and Anxiety**  
*Cortney A. Turner, Stanley J. Watson, and Huda Akil*  
» See corresponding article on page 479

**422** **Is Functional Magnetic Resonance Imaging-Inspired Electroencephalogram Feedback the Next New Treatment in Psychiatry?**  
*Mark S. George*  
» See corresponding article on page 490

### EARLY CAREER INVESTIGATOR COMMENTARY

**e39** **Neurobiology of Chronic Social Defeat Stress: Role of Brain-Derived Neurotrophic Factor Signaling in the Nucleus Accumbens**  
*Anita E. Autry*  
» See corresponding article on page 469

### ARCHIVAL REPORTS

**424** **Intravenous Esketamine in Adult Treatment-Resistant Depression: A Double-Blind, Double-Randomization, Placebo-Controlled Study**  
*Jaskaran B. Singh, Maggie Fedgchin, Ella Daly, Liwen Xi, Caroline Melman, Geert De Bruecker, Andre Tadic, Pascal Sienaert, Frank Wiegand, Husseini Manji, Wayne C. Drevets, and Luc Van Nueten*  
» See commentary on page 416

**432** **Online Effects of Transcranial Direct Current Stimulation in Real Time on Human Prefrontal and Striatal Metabolites**  
*Antoine Hone-Blanchet, Richard A. Edden, and Shirley Fecteau*

**439** **Effects of Creatine Monohydrate Augmentation on Brain Metabolic and Network Outcome Measures in Women With Major Depressive Disorder**  
*Sujung Yoon, Jieun E. Kim, Jaeuk Hwang, Tae-Suk Kim, Hee Jin Kang, Eun Namgung, Soonhyun Ban, Subin Oh, Jeongwon Yang, Perry F. Renshaw, and In Kyoon Lyoo*

**448 Sex Differences in Effects of Ketamine on Behavior, Spine Density, and Synaptic Proteins in Socially Isolated Rats**

*Ambalika Sarkar and Mohamed Kabbaj*  
» See commentary on page 416

**457 Bidirectional Homeostatic Regulation of a Depression-Related Brain State by Gamma-Aminobutyric Acidergic Deficits and Ketamine Treatment**

*Zhen Ren, Horia Pribiag, Sarah J. Jefferson, Matthew Shorey, Thomas Fuchs, David Stellwagen, and Bernhard Luscher*  
» See commentary on page 416

**469 Essential Role of Mesolimbic Brain-Derived Neurotrophic Factor in Chronic Social Stress-Induced Depressive Behaviors**

*Ja Wook Koo, Benoit Labonté, Olivia Engmann, Erin S. Calipari, Barbara Juarez, Zachary Lorsch, Jessica J. Walsh, Allyson K. Friedman, Jordan T. Yorgason, Ming-Hu Han, and Eric J. Nestler*  
» See commentary on page e39

**479 Fibroblast Growth Factor 2 Modulates Hypothalamic Pituitary Axis Activity and Anxiety Behavior Through Glucocorticoid Receptors**

*Natalina Salmaso, Hanna E. Stevens, Jessica McNeill, Maha ElSayed, Qiuyin Ren, Maria E. Maragnoli, Michael L. Schwartz, Simone Tomasi, Robert M. Sapolsky, Ronald Duman, and Flora M. Vaccarino*  
» See commentary on page 419

## TECHNIQUES AND METHODS

---

**490 Limbic Activity Modulation Guided by Functional Magnetic Resonance Imaging-Inspired Electroencephalography Improves Implicit Emotion Regulation**

*Jackob N. Keynan, Yehudit Meir-Hasson, Gadi Gilam, Avihay Cohen, Gilan Jackont, Sivan Kinreich, Limor Ikar, Ayelet Or-Borichev, Amit Etkin, Anett Gyurak, Ilana Klovatch, Nathan Intrator, and Talma Hendler*  
» See commentary on page 422

## CORRESPONDENCE

---

 **e41 The Amount of Mitochondrial DNA in Blood Reflects the Course of a Depressive Episode**

*Jérôme Nicod, Stefanie Wagner, Frederick Vonberg, Amarjit Bhomra, Konrad F. Schlicht, Andre Tadic, Richard Mott, Klaus Lieb, and Jonathan Flint*

 **e43 Deep Brain Stimulation for Depression: Is It a Gray or White “Matter”?**

*Adeline Etiévant, Guillaume Lucas, and Nasser Haddjeri*

 **e45 Reply to: Deep Brain Stimulation for Depression: Is It a Gray or White “Matter”?**

*Clement Hamani and José N. Nobrega*

## ERRATUM

---

**497 Erratum to: “Reply to: Deep Brain Stimulation for Depression: Is It a Gray or White “Matter”?”**

The cover highlights work conducted by Yoon *et al.* (in this issue, pages 439–447). The authors found that female patients with major depressive disorder who received creatine augmentation to their antidepressant treatment showed greater symptom improvement than patients who received placebo augmentation. The creatine group also showed increased prefrontal *N*-acetylaspartate levels and greater rich club connections, suggesting that creatine enhances antidepressant efficacy through its actions on depression-related metabolic and network dysfunction.
