NOVEL SIGNALING MECHANISMS IN DEPRESSION

IN THIS ISSUE - DECEMBER 1ST

807 A brief summary of the articles appearing in this issue of *Biological Psychiatry*.

COMMENTARIES

808 To Stay Happy, Keep Your SIRT1 Active
Snehajyoti Chatterjee and Ted Abel
» See corresponding article on page 815

810 Sleep and Mood: Chicken or Egg?
Louis J. Ptáček, Ying-Hui Fu, and Andrew D. Krystal
» See corresponding article on page 827

812 Depression and Adenylyl Cyclase: Sorting Out the Signals
Mark M. Rasenick
» See corresponding article on page 836

CLINICAL COMMENTARY

e85 Effects of Maternal Prenatal Stress: Mechanisms, Implications, and Novel Therapeutic Interventions
Amalia Londono Tobon, Andrea Diaz Stransky, David A. Ross, and Hanna E. Stevens
» See corresponding article on page 859

EARLY CAREER INVESTIGATOR COMMENTARY

e89 Evidence Mounting for Gene-by-Environment Interactions at the *FKBP5* Locus Predicting Psychiatric Symptoms
Thorhildur Halldorsdottir
» See corresponding article on page 869

ARCHIVAL REPORTS

815 Hippocampal Sirtuin 1 Signaling Mediates Depression-like Behavior
Naoko Abe-Higuchi, Shusaku Uchida, Hirotaka Yamagata, Fumihiko Higuchi, Teruyuki Hobara, Kumiko Hara, Ayumi Kobayashi, and Yoshifumi Watanabe
» See commentary on page 808

827 Genetic Disruption of Circadian Rhythms in the Suprachiasmatic Nucleus Causes Helplessness, Behavioral Despair, and Anxiety-like Behavior in Mice
Dominic Landgraf, Jaimie E. Long, Christophe D. Proulx, Rita Barandas, Roberto Malinow, and David K. Welsh
» See commentary on page 810

836 Ablation of Type III Adenylyl Cyclase in Mice Causes Reduced Neuronal Activity, Altered Sleep Pattern, and Depression-like Phenotypes
Xuanmao Chen, Jie Luo, Yihua Leng, Yimei Yang, Larry S. Zweifel, Richard D. Palmiter, and Daniel R. Storm
» See commentary on page 812

849 Altered Intrinsic Functional Brain Architecture in Children at Familial Risk of Major Depression
Xiaoqian J. Chai, Dina Hirshfeld-Becker, Joseph Biederman, Mai Uchida, Oliver Doehrmann, Julia A. Leonard, John Salvatore, Tara Kenworthy, Ariel Brown, Elana Kagan, Carlo de los Angeles, John D.E. Gabrieli, and Susan Whitfield-Gabrieli

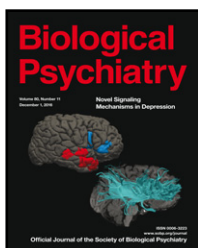

- 859 Prepartum and Postpartum Maternal Depressive Symptoms Are Related to Children's Brain Structure in Preschool**
Catherine Lebel, Matthew Walton, Nicole Letourneau, Gerald F. Giesbrecht, Bonnie J. Kaplan, and Deborah Dewey
» See commentary on page e85
- 869 Associations Between Self-Reported and Objectively Recorded Early Life Stress, FKBP5 Polymorphisms, and Depressive Symptoms in Midlife**
Jari Lahti, Heidi Ala-Mikkula, Eero Kajantie, Kadri Haljas, Johan G. Eriksson, and Katri Räikkönen
» See commentary on page e89
- 878 Gamma-Aminobutyric Acidergic Projections From the Dorsal Raphe to the Nucleus Accumbens Are Regulated by Neuromedin U**
James M. Kasper, David L. McCue, Adrianna J. Milton, Angelia Szwed, Catherine M. Sampson, Mei Huang, Susan Carlton, Herbert Y. Meltzer, Kathryn A. Cunningham, and Jonathan D. Hommel

CORRESPONDENCE

-  **e93 Intrinsic Local Beta Oscillations in the Subgenual Cingulate Relate to Depressive Symptoms in Treatment-Resistant Depression**
Darren L. Clark, Elliot C. Brown, Rajamannar Ramasubbu, and Zelma H.T. Kiss

ERRATUM

- 888 Erratum to: Online Effects of Transcranial Direct Current Stimulation in Real Time on Human Prefrontal and Striatal Metabolites**

Lebel *et al.* (in this issue, pages 859–868) found an association between maternal prenatal depression scores and cortical thickness in two brain regions: a cluster in the right middle temporal region (red) and a cluster in the right inferior frontal region spanning the pars orbitalis and pars triangularis (blue). In addition, the white matter fibers emanating from the inferior frontal region, depicted in cyan, demonstrated a negative correlation between maternal second trimester depressive symptoms and radial and mean diffusivity.
