THE BIOLOGY OF STRESS-INDUCED DEPRESSION

IN THIS ISSUE - APRIL 15TH

615 A brief summary of the articles appearing in this issue of *Biological Psychiatry*.

COMMENTARIES

616 **Histone Crotonylation Makes Its Mark in Depression Research**

Jennifer C Chan and Ian Maze

» See corresponding article on page 635

619 **From Stress Sensitization to Microglial Priming and Vice Versa: A New Era of Research in Biological Psychiatry**

Robert Dantzer

» See corresponding article on page 667

621 **Connecting With Resilience**

Hugh Garavan and Matt Albaugh

» See corresponding article on page 690

ARCHIVAL REPORTS

623 **Sex-Specific Regulation of Fear Memory by Targeted Epigenetic Editing of *Cdk5***

Ajinkya S. Sase, Sonia I. Lombroso, Brandon A. Santhumayor, Rozalyn R. Wood, Carissa J. Lim, Rachael L. Neve, and Elizabeth A. Heller

635 **Chromodomain Y-like Protein–Mediated Histone Crotonylation Regulates Stress-Induced Depressive Behaviors**

Yongqing Liu, Minghua Li, Minghua Fan, Yan Song, Huajing Yu, Xiaojie Zhi, Kuo Xiao, Shirong Lai, Jingliang Zhang, Xueqin Jin, Yongfeng Shang, Jing Liang, and Zhuo Huang

» See commentary on page 616

650 **Hippocampal Salt-Inducible Kinase 2 Plays a Role in Depression via the CREB-Regulated Transcription Coactivator 1–cAMP Response Element Binding–Brain-Derived Neurotrophic Factor Pathway**

Bo Jiang, Hao Wang, Jin-Liang Wang, Ying-Jie Wang, Qing Zhu, Cheng-Niu Wang, Lu Song, Ting-Ting Gao, Yuan Wang, Guo-Liang Meng, Feng Wu, Yong Ling, Wei Zhang, and Jun-Xu Li

667 **The Influence of Microglial Elimination and Repopulation on Stress Sensitization Induced by Repeated Social Defeat**

Michael D. Weber, Daniel B. McKim, Anzela Niraula, Kristina G. Witcher, Wenyuan Yin, Carly G. Sobol, Yufen Wang, Caroline M. Sawicki, John F. Sheridan, and Jonathan P. Godbout

» See commentary on page 619

679 Interleukin-6 Induced by Social Stress Promotes a Unique Transcriptional Signature in the Monocytes That Facilitate Anxiety

Anzela Niraula, Kristina G. Witcher, John F. Sheridan, and Jonathan P. Godbout

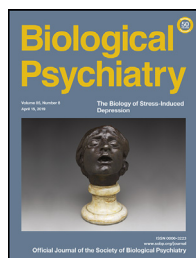

690 Susceptibility or Resilience to Maltreatment Can Be Explained by Specific Differences in Brain Network Architecture

Kyoko Ohashi, Carl M. Anderson, Elizabeth A. Bolger, Alaptagin Khan, Cynthia E. McGreenery, and Martin H. Teicher

» See commentary on page 621

ERRATUM

703 Erratum to: Hippocampal Salt-Inducible Kinase 2 Plays a Role in Depression via the CREB-Regulated Transcription Coactivator 1–cAMP Response Element Binding–Brain-Derived Neurotrophic Factor Pathway

The head of the androgynous sitter tips back slightly to expose the vulnerable surface of the neck. The light reflects the uneven surfaces of the protruding chin, parted lips, closed eyes, and furrowed brows, which all work in concert to highlight the frailty and pain of the sculpted head. The viewer can almost feel the hot breath escape from the open mouth, as if on the verge of releasing a cry for help. In this bronze sculpture, the 19th-century French artist Auguste Rodin (1840–1917) captures the torment of the human soul through this detached fragment of the human head.

Head of Sorrow, 1889. Gift of Mrs. Patrick Dinehart. Photo courtesy of the Yale University Art Gallery. The *Journal* extends its sincere thanks to Dr. Jennifer Reynolds-Kaye, Curator of Education and Academic Outreach at the Yale Center for British Art.
