DEPRESSION: NOVEL MECHANISMS AND PERSONALIZED TREATMENTS

IN THIS ISSUE - OCTOBER 15TH

587 **A brief summary of the articles appearing in this issue of *Biological Psychiatry*.**

COMMENTARIES

588 **The Many Avenues Leading to Adult Neurogenesis Adaptations**
Maura Boldrini
» See corresponding article on page 597

591 **Searching for Genomic Biomarkers for Major Depressive Disorder in Peripheral Immune Cells**
Ke Xu and Bradley E. Aouizerat
» See corresponding article on page 625

594 **Microglial Activation and Response to Anti-inflammatory Treatment in Major Depressive Disorder: Another Piece in the Inflammation–Mood Disorders Puzzle**
Charles L. Raison
» See corresponding article on page 649

EARLY CAREER INVESTIGATOR COMMENTARY

e35  **Central Amygdala Discovery Efforts in Primates Reveals New Clues on Anxious Temperament**
J. Andrew Hardaway
» See corresponding article on page 638

PRIORITY COMMUNICATION

597 **Chronic Pain Impairs Memory Formation via Disruption of Neurogenesis Mediated by Mesohippocampal Brain-Derived Neurotrophic Factor Signaling**
Sun-Hui Xia, Su-Wan Hu, De-Gao Ge, Di Liu, Di Wang, Song Zhang, Qi Zhang, Ling Yuan, Yan-Qiang Li, Jun-Xia Yang, Peng Wu, Hongxing Zhang, Ming-Hu Han, Hai-Lei Ding, and Jun-Li Cao
» See commentary on page 588

REVIEW

611 **The Netrin-1/DCC Guidance Cue Pathway as a Molecular Target in Depression: Translational Evidence**
Angélica Torres-Berrío, Giovanni Hernandez, Eric J. Nestler, and Cecilia Flores

ARCHIVAL REPORTS

625 **Major Depressive Disorder Is Associated With Differential Expression of Innate Immune and Neutrophil-Related Gene Networks in Peripheral Blood: A Quantitative Review of Whole-Genome Transcriptional Data From Case-Control Studies**
Gayle M. Wittenberg, Jon Greene, Petra E. Vértes, Wayne C. Drevets, and Edward T. Bullmore
» See commentary on page 591

638 Transcriptional Profiling of Primate Central Nucleus of the Amygdala Neurons to Understand the Molecular Underpinnings of Early-Life Anxious Temperament

Rothem Kovner, Tade Souaiaia, Andrew S. Fox, Delores A. French, Cooper E. Goss, Patrick H. Roseboom, Jonathan A. Oler, Marissa K. Riedel, Eva M. Fekete, Julie L. Fudge, James A. Knowles, and Ned H. Kalin

» See commentary on page e35

649 Translocator Protein Distribution Volume Predicts Reduction of Symptoms During Open-Label Trial of Celecoxib in Major Depressive Disorder

Sophia Attwells, Elaine Setiawan, Pablo M. Rusjan, Cynthia Xu, Celeste Hutton, Dorsa Rafiei, Benjamin Varughese, Alan Kahn, Stephen J. Kish, Neil Vasdev, Sylvain Houle, and Jeffrey H. Meyer

» See commentary on page 594

657 Pretreatment Reward Sensitivity and Frontostriatal Resting-State Functional Connectivity Are Associated With Response to Bupropion After Sertraline Nonresponse

Yuen-Siang Ang, Roselinde Kaiser, Thilo Deckersbach, Jorge Almeida,

Mary L. Phillips, Henry W. Chase, Christian A. Webb, Ramin Parsey, Maurizio Fava, Patrick McGrath, Myrna Weissman, Phil Adams, Patricia Deldin, Maria A. Oquendo, Melvin G. McClinnis, Thomas Carmody, Gerard Bruder, Crystal M. Cooper, Cherise R. Chin Fatt, Madhukar H. Trivedi, and Diego A. Pizzagalli

CORRESPONDENCE

e37  Rapid Antidepressant Effects of Deep Brain Stimulation and Their Relation to Surgical Protocol

Patricio Riva-Posse, Andrea L. Crowell, Kathryn Wright, Allison C. Waters, KiSueng Choi, Steven J. Garlow, Paul E. Holtzheimer, Robert E. Gross, and Helen S. Mayberg

ERRATUM

668 Erratum to: Major Depressive Disorder Is Associated With Differential Expression of Innate Immune and Neutrophil-Related Gene Networks in Peripheral Blood: A Quantitative Review of Whole-Genome Transcriptional Data From Case-Control Studies

Levels of miR-218 in the prefrontal cortex may determine resilience (on the left) or susceptibility (on the right) to chronic stress in adulthood, as depicted in the graphic on the cover. From the review by Torres-Berrío *et al.* (in this issue, pages 611–624), wherein the authors discuss the role of the Netrin-1/DCC pathway in the maturation of the prefrontal cortex during adolescence and review the preclinical and clinical data linking this pathway to major depressive disorder. © Jill K. Gregory; <http://www.jillkgregory.com/>.
