MEDIATORS OF MOOD DISORDERS AND THEIR TREATMENT

IN THIS ISSUE - DECEMBER 15TH

917 A brief summary of the articles appearing in this issue of *Biological Psychiatry*.

COMMENTARIES

918 Depression Genetics as a Window Into Physical and Mental Health

Karmel W. Choi

» See corresponding article on page 923

920 Opioid Systems and Depression: The Relationship Is Strengthening

Merel Dagher, Catherine M. Cahill, and Christopher J. Evans

» See corresponding article on page 952

EARLY CAREER INVESTIGATOR COMMENTARY

e49 Risk Markers Are Not One Size Fits All

Max P. Herzberg

» See corresponding article on page 932

ARCHIVAL REPORTS

923 Polygenic Liability to Depression Is Associated With Multiple Medical Conditions in the Electronic Health Record: Phenome-wide Association Study of 46,782 Individuals

Yu Fang, Lars G. Fritsche, Bhramar Mukherjee, Srijan Sen, and Leah S. Richmond-Rakerd

» See commentary on page 918

932 Putamen Structure and Function in Familial Risk for Depression: A Multimodal Imaging Study

Ardesheer Talati, Milenna T. van Dijk, Lifang Pan, Xuejun Hao, Zhishun Wang, Marc Gamberoff, Zhengchao Dong, Jürgen Kayser, Stewart Shankman, Priya J. Wickramaratne, Jonathan Posner, and Myrna M. Weissman
» See commentary on page e49

942 Comparative Transcriptional Analyses in the Nucleus Accumbens Identifies RGS2 as a Key Mediator of Depression-Related Behavior

Alexia V. Williams, Catherine J. Peña, Stephanie Ramos-Maciel, Abigail Laman-Maharg, Evelyn Ordoñez-Sanchez, Monica Britton, Blythe Durbin-Johnson, Matt Settles, Rebecca Hao, Sae Yokoyama, Christine Xu, Pei X. Luo, Tjien Dwyer, Shanu Bhela, Alexis M. Black, Benoit Labonté, Randal Alex Serafini, Anne Ruiz, Rachael L. Neve, Venetia Zachariou, Eric J. Nestler, and Brian C. Trainor

952 Contribution of the Opioid System to the Antidepressant Effects of Fluoxetine

Elena Carazo-Arias, Phi T. Nguyen, Marley Kass, Hyun Jung Jee, Katherine M. Nautiyal, Valerie Magalong, Lilian Coie, Valentine Andreu, Mark M. Gergues, Huzefa Khalil, Huda Akil, Danusa Mar Arcego, Michael Meaney, Christoph Anacker, Benjamin A. Samuels, John E. Pintar, Irina Morozova, Sergey Kalachikov, and Rene Hen
» See commentary on page 920

964 Nitrous Oxide, a Rapid Antidepressant, Has Ketamine-like Effects on Excitatory Transmission in the Adult Hippocampus
Yukitoshi Izumi, Fong-Fu Hsu, Charles R. Conway, Peter Nagele, Steven J. Mennerick, and Charles F. Zorumski

973 Linking Individual Differences in Personalized Functional Network Topography to Psychopathology in Youth
Zaixu Cui, Adam R. Pines, Bart Larsen, Valerie J. Sydnor, Hongming Li, Azeez Adebimpe, Aaron F. Alexander-Bloch, Dani S. Bassett, Max Bertolero, Monica E. Calkins, Christos Davatzikos, Damien A. Fair, Ruben C. Gur, Raquel E. Gur, Tyler M. Moore, Sheila Shanmugan, Russell T. Shinohara, Jacob W. Vogel, Cedric H. Xia, Yong Fan, and Theodore D. Satterthwaite

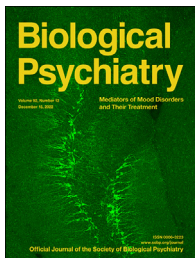

984 Astrocytes Mediate Cholinergic Regulation of Adult Hippocampal Neurogenesis and Memory Through M₁ Muscarinic Receptor
Wei-Peng Li, Xiao-Hong Su, Neng-Yuan Hu, Jian Hu, Xiao-Wen Li, Jian-Ming Yang, and Tian-Ming Gao

CORRESPONDENCE

 **e51 Prescribing Sleep With an Evolutionary Perspective to Prevent Postpartum Depression**
María Berrozpe, Carmela Baeza, and Ibone Olza

ACKNOWLEDGMENTS

999 Acknowledgments

In this issue, Carazo-Arias *et al.* (pages 952–963) provide insights into the molecular mechanisms underlying the opioid system’s involvement in the antidepressant effects of fluoxetine. As part of their work, and shown by the representative image featured on the cover, the authors found that fluoxetine treatment increased neurogenesis in both wild-type and delta opioid receptor knockout mice. See Figure 7 for further details.
